

BEER DISPENSER INSTRUCTIONS

IMPORTANT – PLEASE KEEP INSTRUCTIONS FOR FUTURE USE / REFERENCE

Assembly instructions

1. Take out of box carefully to avoid scratching or damage.
2. BEER CONTAINER: place container into the base. Put the lid on top of the container.

Usage

1. Take out container from base if it is necessary for more comfortable filling in.
2. Take out ice container.
3. Pour some beer. It will start to drip and it will be necessary to open and close the tap a bit to stop the dripping
4. Tilt container at an angle and pour beer in.
Do not pour past the top line.
(Angle of pour and temperature of beer will affect amount of foaming.
You can reduce foaming by rinsing container with cold water before pouring beer).
5. Put ice cubes inside the ice container, close it and set it inside the beer container then check that it is correctly close.
6. Align the container and base.
7. Ready to use. Enjoy your beer responsibly.

Note: the giraffe tower must be filled till the gauge line for measuring a quantity of beer to be sold for immediate consumption.

Terms of use

- Upper temperature limit: 30°C
- Lower temperature limit: 5°C
- Place the product on a clean flat surface

General cleaning and maintenance considerations in every use

- **While disassembling be careful to do not break any part. Clean it by hand.**
- Remove container from base. Remove lid and ice chamber from container.
- Unscrew the handle for easy cleaning.
- Use clean sponge or cloth with soap and water to clean all the pieces **in every use**.
- Rinse inside of container well and open the tap to allow water to run through.
- Use wet cloth to wipe the base clean.
- Do not put any parts into dishwasher.
- For more cleaning information please check the video of the quality section.

Important

- The intended use of the product is to serve beer, and cannot be used for measuring other liquids.
- **When the filling line is no longer clearly visible, the product cannot be used for direct sale any more.**
